Clear:
SoColor Clear can be mixed with any SoColor Blended Natural, Vibrant or SoRed shade to reduce its tonal deposit. For example, mixing in equal parts with another shade can reduce tonal deposition by roughly a level. Clear can also be used alone to provide up to 4 levels of lift (when mixed with 12% Matrix Cream Developer) without depositing any tone. Clear is not recommended for mixing with Extra Coverage shades as grey coverage will be reduced.

CLEAR

SoRed:
SR-C, SR-R, SR-RV

Use alone or as an additive as a booster in other SoColor shades to increase intensity.

As an off scalp highlighter:
1 prt SoRed + 1 prt Matrix Cream Developer

As a Booster:
3 prts SoColor shade + 1 prt SoRed + 4 prts Matrix Cream Developer

Shades shown on level, 50% grey hair. Shades with an HD-R icon must not be mixed with any other shades besides Clear.

Ultra Blonde Collection

A .1	P .9	V .2/.22	NV .02	N .0	M .8
UL-A+		UL-V+		UL-N+	
	UL-P	UL-VV	UL-NV+	UL-N	UL-M

UL+ shades will provide up to 1/2 level of additional lift

Mixing & Timing Guidelines

Collection:	Mixing & Matrix Cream Developer:	Processing Time:	Special Notes:
Blended Natural & Vibrant	1:1 (1 part developer: 1 part colour) 3%, 6%, 9%, 12%	35 Minutes	Best when used on 0-50% grey hair (except for N's which can be used on up to 100% grey). Can be mixed with other SoColor Blended Natural and Vibrant* shades and Extra Coverage shades.
Extra Coverage	1:1 (1 part developer: 1 part colour) 6%	35 Minutes	Best when used on 50-100% grey hair or resistant grey hair. Can be mixed with SoColor Blended Natural & Vibrant* shades.
UL	2:1 (2 parts developer: 1 part colour) 9%, 12%	50 Minutes	Only mix UL shades with each other. Do not mix with any other shades.

*Except shades containing HD-Red dyes: 6RC+, 5RV+, 5RR+, 7RR+

	Up To 100% Grey Coverage		Vibrant Colour		Up To 5 Levels Of Lift	Lift Without	Intermixed To Reduce
